Ulcerative Colitis (with medication exposure)

Help Us Understand the Effects of Ulcerative Colitis in Pregnancy

Many people need to take medication during pregnancy to appropriately manage their ulcerative colitis. Yet fewer than 10% of medications have enough information to determine their safety for use in pregnancy — this is where we need you as our partner!

> *"There is a huge need to generate more info for all of the drugs that people who are pregnant need to take."*
>
> *--- Christina Chambers, PhD, MPH, Lead Investigator, MotherToBaby Pregnancy Studies*

Do you have ulcerative colitis with exposure to Tremfya® (guselkumab)? Are you currently pregnant? If you answered "yes" to both of these questions, you may be able to help us advance our knowledge of how ulcerative colitis and its management can affect a pregnancy and a developing baby.

Will you take the step and become our partner? Make an impact on the health of future families today by joining our Pregnancy Study!

Ulcerative Colitis (with medication exposure)

You Can Help Future Moms & Babies

Volunteer for research to improve the health of families everywhere. MotherToBaby is currently enrolling people who are pregnant in observational studies to help provide crucial information about health during pregnancy. All research is done by the phone — no changes to your normal routine or travel required.

> *"We hope to unlock the key factors that drive pregnancy complications. What we learn will help lead to improved outcomes for families."*
>
> *— Christina Chambers, PhD, MPH, Lead Investigator, MotherToBaby Pregnancy Studies*

Over 4,000 people have volunteered to participate in one or more of our pregnancy studies. Help us help future families by becoming one of them!
