Help Us Better Understand the Tdap ("Whooping Cough") Vaccine in Pregnancy

MotherToBaby is currently enrolling pregnant people in a study examining the use of the Tdap (tetanus, diphtheria, and pertussis) vaccine during pregnancy. All of our pregnancy research is observational and is conducted by phone — no changes to your normal routine or travel required.

"We believe our study results can help women and their doctors become better informed about the Tdap vaccine

during pregnancy."

— Christina Chambers, PhD, MPH, Lead Investigator, MotherToBaby Pregnancy Studies

Are you currently pregnant? Did you receive the Tdap vaccine at any point in your current pregnancy? If you answered "yes" to both of these questions, then you have the opportunity to help us learn more about the Tdap vaccine in pregnancy.

Will you take the step and become our partner? Make an impact on the health of future families today by joining our Tdap Vaccine & Pregnancy Study!
