## **Help Us Better Understand the Tdap (“Whooping Cough”) Vaccine in Pregnancy**

MotherToBaby is currently enrolling pregnant people in a study examining the use of the Tdap (tetanus, diphtheria, and pertussis) vaccine during pregnancy. All of our pregnancy research is observational and is conducted by phone — no changes to your normal routine or travel required.

*“We believe our study results can help women and their doctors become better informed about the Tdap vaccine during pregnancy.”*

— Christina Chambers, PhD, MPH, Lead Investigator, MotherToBaby Pregnancy Studies

Are you currently pregnant? Did you receive the Tdap vaccine at any point in your current pregnancy? If you answered “yes” to both of these questions, then you have the opportunity to help us learn more about the Tdap vaccine in pregnancy.

Will you take the step and become our partner? Make an impact on the health of future families today by joining our Tdap Vaccine & Pregnancy Study!

## You Can Help Future Moms & Babies

Volunteer for research to improve the health of families everywhere. MotherToBaby is currently enrolling people who are pregnant in observational studies to help provide crucial information about the safety of medications and vaccines during pregnancy.

Participants without medicine or vaccination exposures are needed. All research is done by the phone — no changes to your normal routine or travel required.

*“We hope to identify as early as possible the circumstances in which a drug or immunization causes harm.”*

*— Christina Chambers, PhD, MPH, Lead Investigator, MotherToBaby Pregnancy Studies*

Over 4,000 people have volunteered to participate in one or more of our pregnancy studies. Help us help future families by becoming one of them – find out if you qualify today!
