Ilumya® (tildrakizumab-asmn)

Help Us Better Understand the Possible Effects of Ilumya® in Pregnancy

Many people need to take medication during pregnancy to appropriately manage a chronic health condition. In some cases, avoiding or stopping medication use during pregnancy may be more harmful than taking medication. Yet fewer than 10% of medications have enough information to determine their safety for use in pregnancy — this is where you come in!

MotherToBaby is currently enrolling people who are pregnant in a study examining the use of Ilumya® (tildrakizumab-asmn) to treat psoriasis during pregnancy.

> *"There is a huge need to generate more info for all of the drugs that people who are pregnant need to take."*
>
> *--- Christina Chambers, PhD, MPH, Lead Investigator, MotherToBaby Pregnancy Studies*

Are you currently pregnant? Did you take Ilumya® at any point in your current pregnancy? If you answered "yes" to both of these questions, then you have the opportunity to help us learn more about Ilumya® use in pregnancy.

Will you take the step and become our partner? Make an impact on the health of future families today by joining our Ilumya® & Pregnancy Study!

Ilumya® (tildrakizumab-asmn)

Help Us Understand the Effects of Eczema in Pregnancy

Many people need to take medication during pregnancy to appropriately manage their moderate-to-severe eczema (atopic dermatitis). Yet fewer than 10% of medications have enough information to determine their safety for use in pregnancy — this is where we need you as our partner!

> *"There is a huge need to generate more info for all of the drugs that people who are pregnant need to take."*
>
> *--- Christina Chambers, PhD, MPH, Lead Investigator, MotherToBaby Pregnancy Studies*

Do you have moderate-to-severe eczema? Are you currently pregnant? If you answered "yes" to both of these questions, you may be able to help us advance our knowledge of how moderate-to-severe eczema and its management can affect a pregnancy and a developing baby.

Will you take the step and become our partner? Make an impact on the health of future families today by joining our Eczema & Pregnancy Study!

MotherToBaby is conducting a **pregnancy study on eczema** to better understand how medications to treat it may affect pregnancy and baby's health. By participating, you can help improve treatment information for other moms with eczema.

Researchers collect information through phone interviews, electronic medical records, and online surveys. By sharing your experience, you're helping researchers gather real-world information about eczema medications when used during pregnancy.

Let's work together for clearer answers. Sign up at **mothertobaby.org/join**.
