

Ep. 86: Folic Acid Facts & Fiction: What Every Parent Should Know - with Dr. Elisabeth Marnik (@ScienceWhizLiz)

In this special Folic Acid Awareness Week episode of *The MotherToBaby Podcast*, host and genetic counselor Chris Stallman sits down with Dr. Elisabeth Marnik, PhD—a biomedical scientist, mom, and science communicator better known as [@ScienceWhizLiz on Instagram](#). Together, they unpack the science behind folic acid, its critical role in early pregnancy, and why it's one of the most important (yet misunderstood) nutrients for people of childbearing age.

From real talk on neural tube defect prevention to busting social media myths like “folic acid causes tongue ties” or “MTHFR mutations mean folic acid isn't safe,” this episode is packed with science-backed insights and practical guidance for both healthcare providers and future parents alike.

□ Key Topics Covered:

- What folic acid is and why it matters for pregnancy
- The difference between folic acid and folate
- When folic acid is most critical (hint: before you know you're pregnant!)
- Myths and misinformation about folic acid—especially on social media
- What the research *really* says about MTHFR gene mutations
- How to support patients with dietary restrictions or supplement concerns
- Why more folic acid is *not* always better

□ Guest Bio:

Dr. Elisabeth Marnik is a biomedical scientist with a PhD from Tufts University and The Jackson Laboratory, where she studied immune system function, autoimmune disease, and vaccine response. She's also a passionate science communicator who makes complex topics clear and relatable for thousands of followers as [@ScienceWhizLiz](#) on

Instagram.

Ep. 86: Folic Acid Facts & Fiction: What Every Parent Should Know - with Dr. Elisabeth Marnik (@ScienceWhizLiz)

Chris Stallman, a certified genetic counselor, teratogen information specialist and mother of three (soon four), talks with two experts and new moms from the Centers for Disease Control and Prevention about the five tips for preventing birth defects, which includes taking enough folic acid every day, booking a visit with your healthcare provider before

stopping or starting any medicine, and getting up to date with all vaccines, including the flu shot. The tips are part of the theme for January's National Birth Defects Prevention Month.
