

Help Future Moms & Babies

Volunteer for research to improve the health of mom and babies.

Are you one of the estimated 50 million North Americans who has an autoimmune disease? Are you also pregnant or planning to become pregnant? If so you may have questions about how autoimmune disease will affect your baby.

MotherToBaby is currently enrolling pregnant women in observational study to help provide crucial information about autoimmune disease during pregnancy. All research is done by the phone—no changes to your normal routine or travel required.

Make an impact on autoimmune disease and pregnancy research by enrolling into our observational research study!
