

# Help Moms With Asthma

---

## Volunteer for research to improve the health of moms and babies.

MotherToBaby is currently enrolling pregnant women in an observational study to explore how asthma and its treatment affect pregnancy. All studies are conducted through phone interviews—no changes to your normal routine or travel required. **If you've taken FASENRA® (benralizumab), NUCALA® (mepolizumab) or DUPIXENT® (dupilumab) and are pregnant, you may qualify for this important study.**

## Join our Study

Disclaimer: MotherToBaby Fact Sheets are meant for general information purposes and should not replace the advice of your health care provider. MotherToBaby is a service of the non-profit Organization of Teratology Information Specialists (OTIS). *OTIS/MotherToBaby encourages inclusive and person-centered language. While our name still contains a reference to mothers, we are updating our resources with more inclusive terms. Use of the term mother or maternal refers to a person who is pregnant. Use of the term father or paternal refers to a person who contributes sperm.* Copyright by OTIS, January 30, 2019.
