

# Medication Safety in Pregnancy?

---

## Help future moms and babies by enrolling into our Actemra® & Pregnancy study.

MotherToBaby is currently enrolling pregnant women in an observational study to explore how rheumatoid arthritis (RA) and its treatment affect pregnancy. All studies are conducted through phone interviews--no changes to your normal routine or travel required. If you've taken Actemra® (tocilizumab) and are pregnant, you may qualify for this important study.

*"There is a huge need to generate more data for all of the drugs that pregnant women need to take."*

— Christina Chambers, PhD MPH, MotherToBaby Pregnancy Studies

MotherToBaby is listed as a resource for information about medications in pregnancy by the US Food and Drug Administration (FDA) and the Centers for Disease Control and Prevention (CDC).

## Yes, I'm interested in volunteering in the Actemra® & Pregnancy Study!
