

Join an Observational Pregnancy Study on Lupus

Help future moms and babies by enrolling into our Benlysta & Pregnancy study.

MotherToBaby is currently enrolling pregnant people in a study examining the use of Benlysta (belimumab) when taken during pregnancy. If you've taken Benlysta and are pregnant, you may qualify for this important study. Our study includes:

- 1-3 phone interviews during your pregnancy and at least 1 interview after you have your baby.
- Your permission to obtain a copy of your and your baby's medical records from your healthcare providers.
- An opportunity to receive a specialized, non-invasive exam of your baby with a study doctor

"Help us improve the ability for pregnant people and their healthcare providers to make safe treatment decisions by joining our Benlysta & Pregnancy study."

— Christina Chambers, PhD, MPH, MotherToBaby Pregnancy Studies

If you have lupus and are pregnant, you may qualify to join this important study.

Disclaimer: MotherToBaby Fact Sheets are meant for general information purposes and should not replace the advice of your health care provider. MotherToBaby is a service of the non-profit Organization of Teratology Information Specialists (OTIS). OTIS/MotherToBaby encourages inclusive and person-centered language. While our name still contains a reference to mothers, we are updating our resources with more inclusive terms. Use of the term mother or maternal refers to a person who is pregnant. Use of the term father or paternal refers to a person who contributes sperm. Copyright by OTIS, June 23, 2021.
