

# Join a Pregnancy Study on CIMZIA® (certolizumab pegol)

---

## We're Collecting Info on Cimzia® When Taken in Pregnancy

MotherToBaby is currently enrolling participants into an observational study examining the use of CIMZIA® (certolizumab pegol) when taken during pregnancy. Our research is by observation only—we will not ask you to take or change any medications. If you join our CIMZIA® study, our team will simply collect some information about your pregnancy and your baby's development for a period of time after birth. If you have taken Cimzia® during your current pregnancy, you may qualify for this important study.

## How Our Studies Work

Parent-To-Be Enrolls in Study

We Gather Info about the Pregnancy

Discoveries & Insights Gained

## What's Involved?

Our study includes:

- 1-3 phone interviews during your pregnancy and at least 1 interview after you have your baby.
- Your permission to obtain a copy of your and your baby's medical records from your healthcare providers.
- An opportunity to receive a specialized, non-invasive exam of your baby with a study doctor

## What is MotherToBaby Pregnancy Studies?

MotherToBaby Pregnancy Studies is a research program seeking to understand how certain medications, vaccines, or health conditions may affect pregnancy. Our research will help people who are pregnant and/or breastfeeding and health providers make informed treatment decisions. All of our studies are observational: we will never ask someone to take or change any aspect of their current health routine.

## Who Leads MotherToBaby Pregnancy Studies?

Christina Chambers, PhD, MPH is the lead investigator for MotherToBaby Pregnancy Studies, which are coordinated by UC San Diego's Center for Better Beginnings. She is a world-renowned perinatal epidemiologist and a Professor of Pediatrics and Family and Preventive Medicine at the UC San Diego. Her interests are in the areas of birth defects and other pregnancy outcomes, with a special focus on exposures that can cause birth defects.

***“Every person deserves to know if their health conditions or the medication they need to take could affect their baby during pregnancy. We are committed to bringing you better information for healthier outcomes.”***

– Christina Chambers, PhD, MPH
