

# Help Moms During Pregnancy

---

## Volunteer for research to improve the health of moms and babies.

MotherToBaby is currently enrolling pregnant women in an observational study to explore how rheumatoid arthritis (RA), psoriasis (PSO), psoriatic arthritis (PsA), inflammatory bowel disease (IBD) & ankylosing spondylitis (AS), and its treatment affect pregnancy. All studies are conducted through phone interviews—no changes to your normal routine or travel required. If you've taken CIMZIA® (vedolizumab) and are pregnant, you may qualify for this important study.

MotherToBaby is the most trusted information source for medication safety in pregnancy.

*“There is a huge need to generate more data for all of the drugs that pregnant women need to take.”*

— Christina Chambers, PhD, MPH, MotherToBaby Pregnancy Studies

Make an impact on chronic illness research by enrolling into our pregnancy studies.
