

Join an Observational Pregnancy Study

Volunteer for research to improve the health of moms and babies.

MotherToBaby is currently enrolling pregnant women in a study examining the use of Dupixent® (dupilumab) to treat moderate-to-severe eczema (atopic dermatitis) or asthma during pregnancy. **The study is conducted through phone interviews—no changes to your normal routine or travel required. If you’ve taken Dupixent® (dupilumab) and are pregnant, you may qualify for this important study.**

“There is a huge need to generate more data for all of the drugs that pregnant women need to take.”

— Christina Chambers, PhD, MPH, MotherToBaby Pregnancy Studies

MotherToBaby is the most trusted information source for medication safety in pregnancy. Make an impact on maternal health by enrolling into our pregnancy study.

Disclaimer: MotherToBaby Fact Sheets are meant for general information purposes and should not replace the advice of your health care provider. MotherToBaby is a service of the non-profit Organization of Teratology Information Specialists (OTIS). OTIS/MotherToBaby encourages inclusive and person-centered language. While our name still contains a reference to mothers, we are updating our resources with more inclusive terms. Use of the term mother or maternal refers to a person who is pregnant. Use of the term father or paternal refers to a person who contributes sperm. Copyright by OTIS, November 2, 2018.
