

Help Moms With Psoriasis

Volunteer for research to improve the health of moms and babies.

MotherToBaby is currently enrolling pregnant women in an observational study to explore how psoriasis and its treatment affect pregnancy. All studies are conducted through phone interviews—no changes to your normal routine or travel required. If you've taken Tremfya® (guselkumab) and are pregnant, you may qualify for this important study.

"There is a huge need to generate more data for all of the drugs that pregnant women need to take."

— Christina Chambers, PhD, MPH, MotherToBaby Pregnancy Studies

UC San Diego
CENTER FOR BETTER BEGINNINGS

Make an impact on psoriasis research by enrolling into our pregnancy study.
