

How May Asthma Impact Pregnancy?

With Your Help We Can Find Out.

MotherToBaby is currently enrolling pregnant women with asthma in an observational study to learn more about asthma and its treatment during pregnancy.

If you join our study, our team will monitor your pregnancy and your baby's development for a period of time after birth. **Our research is by observation only—we will not ask you to take or change any medications. Plus, you can participate from the comfort of your home.**

All of our studies include:

- 1-3 phone interviews during your pregnancy and at least 1 interview after you have your baby. Some studies may have additional interviews.
- Your permission to obtain a copy of your and your baby's medical records from your healthcare providers.

"Help us improve the ability for pregnant women and their health provider to make safe treatments decisions by joining our Asthma & Pregnancy study."

— Christina Chambers, PhD, MPH, MotherToBaby Pregnancy Studies

If you have asthma and are 18 weeks pregnant or less, you can join this important study!
