COVID-19 Vaccination During Pregnancy

“Maternal, Pregnancy, and Infant Health Outcomes Following COVID-19 Vaccination During Pregnancy: Findings from CDC’s COVID-19 Pregnancy Registry” features Sabrina A. Madni, MPH, and Lauren Head Zauche, PhD, RN, CPNP-PC, of the Centers for Disease Control and Prevention.

The presentation covers findings on miscarriage, preterm birth, perinatal death, hypertensive disorders during pregnancy, and neonatal and infant health outcomes following maternal COVID-19 vaccination. It is designed to support healthcare providers in patient counseling.

About the presenters

Lauren Zauche is a nurse consultant in CDC’s Immunization Safety Office within the National Center for Emerging and Zoonotic Infectious Diseases. She received her PhD in nursing from Emory University in 2017. As a practicing primary care pediatric nurse practitioner, Lauren applies her clinical and epidemiological expertise to support the design, evaluation, and interpretation of vaccine safety studies, helping inform evidence-based immunization policies.

Sabrina Madni is an epidemiologist in CDC's Infant Outcomes Monitoring, Research, and Prevention Branch within the National Center on Birth Defects and Developmental Disabilities. She received her MPH from Emory University in 2019. Her work focuses on prenatal exposure surveillance. As a perinatal epidemiologist, Sabrina designs and conducts analyses using mother-infant linked longitudinal data to inform evidence-based practices.

COVID-19 Vaccination During Pregnancy

Recent headlines about Hantavirus have raised new questions about animal-associated infections and their potential impact during pregnancy and breastfeeding. This webinar features maternal-fetal medicine specialist Dr. Sarah Dotters-Katz and explores Hantavirus alongside other important animal-associated infections, including lymphocytic choriomeningitis virus (LCMV), rabies, and Salmonella exposures linked to poultry and reptiles.

Designed for healthcare professionals who counsel pregnant and breastfeeding women, this webinar reviews what is currently known about maternal illness, pregnancy outcomes, breastfeeding considerations, prevention strategies, and patient counseling recommendations. Whether you're a physician, nurse, pharmacist, genetic counselor, teratogen information specialist, or other healthcare provider, you'll gain practical insights to help answer patient questions and navigate real-world exposure scenarios.

COVID-19 Vaccination During Pregnancy

Questions about COVID-19 and GLP-1 medications are common in the pregnant/postpartum population. Newborn care specialists, who provide in-home infant care and parent education during the postpartum period, can assist families in navigating these topics.

Designed specifically for newborn care specialists, this webinar will help identify some commonly asked questions about COVID-19 and GLP-1 medications, apply communication strategies that support families and their questions while staying within professional scope, and recognize when family questions require referral to healthcare providers.

Chris Stallman, MLS, MS is a certified genetic counselor, Program Director of the University of Arizona Genetic Counseling Graduate Program, and Director of MotherToBaby Arizona. As a teratogen information specialist with MotherToBaby, Chris supports patients, families, and healthcare providers in navigating questions about medications and other exposures during pregnancy and breastfeeding and promotes evidence-based, accessible health information.

COVID-19 Vaccination During Pregnancy

Dr. Miguel del Campo Casanelles is a pediatric clinical geneticist and Head of Medical Genetics at Vall d'Hebron University Hospital in Barcelona. This webinar reviews what we've learned since the height of the Zika epidemic, current research, and how to guide patients in a changing risk landscape.

Dr. del Campo is a Board-certified in Clinical Genetics by the American Board of Medical Genetics, he trained in pediatrics and neonatology and completed advanced fellowship training in clinical genetics and dysmorphology at the University of California, San Diego. He brings extensive international experience in congenital malformations, prenatal diagnosis, and multidisciplinary genetic care.

COVID-19 Vaccination During Pregnancy

This free webinar features Mark Allen Turrentine, MD, FACOG, a nationally recognized OB-GYN from Texas Children's Hospital and the Baylor College of Medicine, who also serves as Chair of the American College of Obstetricians and Gynecologists (ACOG) Committee on Practice Bulletins. Dr. Turrentine has authored numerous clinical guidelines, including ***COVID-19 Vaccination Considerations for Obstetric-Gynecologic Care***, and is widely respected for his leadership in advancing evidence-based care for pregnant individuals.

In this provider-focused session, Dr. Turrentine offers clear, practical guidance on how to counsel patients about travel during pregnancy. He reviews current evidence on maternal and fetal health considerations, risks associated with air and long-distance travel, and key factors clinicians should weigh when advising patients. The discussion also highlights special concerns, such as travel during later stages of pregnancy, access to medical care while away from home, and how underlying health conditions may influence recommendations.

Designed specifically for obstetric and gynecologic providers, this webinar equips participants with research-based insights and real-world strategies to support informed decision-making. Attendees will gain confidence in guiding patients through complex travel-related questions, ensuring advice is consistent, up-to-date, and tailored to each individual's circumstances.
