

Staying in Scope: Understanding COVID-19 and GLP-1 Medication Exposures in Pregnancy

Questions about COVID-19 and GLP-1 medications are common in the pregnant/postpartum population. Newborn care specialists, who provide in-home infant care and parent education during the postpartum period, can assist families in navigating these topics.

Designed specifically for newborn care specialists, this webinar will help identify some commonly asked questions about COVID-19 and GLP-1 medications, apply communication strategies that support families and their questions while staying within professional scope, and recognize when family questions require referral to healthcare providers.

Chris Stallman, MLS, MS is a certified genetic counselor, Program Director of the University of Arizona Genetic Counseling Graduate Program, and Director of MotherToBaby Arizona. As a teratogen information specialist with MotherToBaby, Chris supports patients, families, and healthcare providers in navigating questions about medications and other exposures during pregnancy and breastfeeding and promotes evidence-based, accessible health information.

Staying in Scope: Understanding COVID-19 and GLP-1 Medication Exposures in Pregnancy

Respiratory virus season brings increased risks for pregnant women and their babies. In this timely webinar, **Alisa Kachikis, MD, MSc, from the University of Washington Medical Center** and member of the **American College of Obstetricians and Gynecologists (ACOG)**, shares the most up-to-date, evidence-based guidance on RSV, influenza, and COVID-19 during pregnancy.

Dr. Kachikis discusses the recommended vaccines, their safety and effectiveness, and how they can protect both parent and baby. She also reviews the potential complications these viruses can cause during pregnancy and what patients need to know to make informed decisions about vaccination. Designed for healthcare professionals and public health advocates, this presentation offers essential information to support conversations with pregnant women and ensure strong protection during respiratory virus season.

RSV & Flu & COVID-19, Oh My!
Everything You Need to Know about Vaccines in
Pregnancy for the Upcoming Respiratory Virus
Season
