

Assisted Reproduction and Birth Defects Risk

In recognition of World Birth Defects Day, MotherToBaby hosted a special educational webinar, “Assisted Reproduction and Birth Defects Risk.” The session features Dr. Sarah Običan, Division Director of Maternal-Fetal Medicine at University of South Florida Health and Medical Director of MotherToBaby Florida. Dr. Običan is a board-certified obstetrician-gynecologist specializing in maternal-fetal medicine, with particular expertise in teratology, fetal echocardiography, and fetal therapy. She completed her medical degree at the University of Miami School of Medicine, her residency in Obstetrics and Gynecology at George Washington University, and her maternal-fetal medicine fellowship at Columbia University Medical Center. She also completed fellowship training in reproductive teratology and toxicology. In addition to her clinical and academic leadership as an Associate Professor at USF, Dr. Običan is a past president of MotherToBaby, a service of the Organization of Teratology Information Specialists.

During this webinar, Dr. Običan reviews current evidence on assisted reproductive technologies and birth defects risk, with practical insights for healthcare professionals involved in patient counseling and clinical care.
