

# Skin Disease Treatments during Pregnancy

Are you treating a patient with **atopic dermatitis** or **psoriasis** who is pregnant or planning a pregnancy?

**MotherToBaby Pregnancy Studies** is currently conducting observational research studies for pregnant women diagnosed with atopic dermatitis or psoriasis.

You can contribute to the greater understanding of dermatological treatments during pregnancy.

**Refer your patients today!**

**MotherToBaby**  
PREGNANCY STUDIES

# Help us **find answers** on how **atopic dermatitis, psoriasis,** and their treatments affect **pregnancy** outcome.

## **PATIENT PARTICIPATION INVOLVES**

- One to three phone interviews during pregnancy with at least one interview after delivery
- Releasing medical records for their pregnancy and for their baby up to one year of age
- An opportunity to receive a free specialized pediatric exam
- No travel or changes to healthcare routine are required

## **Referrals are easy**
